HOW TO USE THIS GUIDE

This companion guide was built to help you *live* the principles inside **Operation Optimal**, not just read about them. Each section walks you through the same core ideas from the book, but in a format that helps you **apply**, **reflect**, and **track** your progress in real life.

Think of it as your personal field manual. Where the book explains *why* optimal living matters, this guide shows you *how* to practice it, one step, one habit, one insight at a time.

HOW IT WORKS

- **FOLLOW ONE SECTION PER WEEK.**

Each section condenses key lessons from the book into short summaries, practical checklists, and micro-action plans. One week gives you time to focus, test, and reflect before moving to the next area.

- **USE IT ALONGSIDE YOUR READING.**

You can read a chapter, then complete the matching section here. Or, if you've already finished the book, work through this guide independently as a refresher and accountability tool.

- **WRITE DIRECTLY IN THE BOOK.**

This is meant to be used, not kept clean. Treat it like a training log: underline, circle, and take notes as you go. Your progress becomes your story of transformation.

ICONS & SYMBOLS

To make things simple, you'll see these three icons throughout the guide:

Reflection

Pause and think. These prompts help you clarify beliefs, patterns, and mindset shifts.

Action

Do something. These micro-steps move you from theory to practice in your daily life.

Tracking

Measure your progress. Use these spaces to log habits, energy, or key metrics that keep you accountable.

BEFORE YOU BEGIN

You don't have to be perfect, just consistent. Commit to working through one page a day, and by the end of this guide, you'll have built a clear, repeatable system for living *optimally* in body, mind, and purpose.

Let's get **started**.

SECTION I

THE FOUNDATION

The Optimal Mindset &
Understanding Stress

Icons:  Reflection •  Action •  Tracking

CHAPTER SNAPSHOTS & LENS

OWN YOUR HEALTH · GROWTH SIGNALS

1. CHAPTER SNAPSHOTS

OWN YOUR HEALTH

- You are not a passive patient.
- Prevention beats prescription. Symptoms are outcomes. Causes are upstream.
- Trust but verify. Ask questions. Make choices.
- Health is objective. Wealth flows from health, not the other way around.

GROWTH SIGNALS

- Your body speaks through signals. Learn the language.
- Hormesis: the right dose of stress makes you stronger.
- Pain vs. hurt. Pain = stop. Hurt = growth.
- Awareness precedes change. When you can name it, you can change it.

2. SIGNALS VS. SYMPTOMS QUICK GUIDE

Signals — patterns that repeat; discomfort that improves with smart effort; data you can track and influence.

Symptoms — sudden sharp pain; red flags that worsen with exertion; disruption that blocks basic function.

Reflection: What recurring signal has been trying to get my attention?

EARLY STRESS SIGNS CHECKLIST

PHYSICAL

- | | |
|---|--|
| ☐ Jaw tension or headaches | ☐ Heartburn or bloating |
| ☐ Restless sleep or early waking | ☐ Elevated resting heart rate |
| ☐ Afternoon energy crash | ☐ Skin flare-ups |

EMOTIONAL

- | | |
|---|--|
| ☐ Irritability or short fuse | ☐ Hopeless inner talk |
| ☐ Overwhelm or indecision | ☐ Numbness or disengagement |

BEHAVIORAL

- | | |
|---|--|
| ☐ Late-night scrolling | ☐ Skipping workouts |
| ☐ Skipping meals or grazing | ☐ Avoiding hard conversations |
| ☐ Sugar hits and caffeine spikes | |

Reflection: Where does stress show up first for me—body, emotions, or behaviors?

MINDSET RESET MENU

PICK ONE TOOL IN THE MOMENT. DO IT NOW.

STATE RESETS

- ☐ 10 slow nasal breaths (4 in / 6 out)
- ☐ 5-minute outdoor walk; get light in your eyes
- ☐ 20 bodyweight squats or a 60-second plank

INPUTS THAT STABILIZE

- ☐ Water plus electrolytes
- ☐ Protein first at the next meal
- ☐ Phone parked in another room for 30 minutes

THOUGHT PATTERNS

- ☐ Two-question Stoic check: *What can I control? What will I accept?*
- ☐ Script swap: "This is hard" → "This is practice."
- ☐ One-line gratitude: "Today I appreciate ____."

Action: Choose 1 state reset, 1 input, and 1 thought pattern you will practice this week.

PAIN VS. HURT DECISION CARD

ASK:

- Sharp, localized, joint-deep pain that worsens with movement?
→ **STOP**. Modify. Check form. Consider evaluation.
- Diffuse burn/effort that eases after warm-up and recovers with sleep/food?
→ **PROCEED**. That's growth.

Reflection: Where have I been avoiding healthy hurt?

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

MICRO-ACTION PLAN · ONE-HABIT WEEK

GOAL: One small daily habit to manage stress and build momentum. Keep it tiny.

EXAMPLES:

- 10-minute walk after lunch
- Phone down 60 min before bed
- Protein at breakfast
- 2 minutes of box breathing before meetings

MY ONE HABIT:

WHEN IT HAPPENS (TIE TO A TRIGGER):

After I _____ I will _____.

WHY IT MATTERS TO ME:

Action: Daily checklist (14 pt checkboxes)

Mon ☐ Tue ☐ Wed ☐ Thu ☐ Fri ☐ Sat ☐ Sun ☐

Tracking prompt: Rate today—Stress **1–5** · Energy **1–5**

Mon __ / __ · Tue __ / __ · Wed __ / __ · Thu __ / __ · Fri __ / __ · Sat __ / __ · Sun __ / __

SIGNALS LOG (3 DAYS) & CLINIC CARD

AWARENESS BUILDER · SIGNALS LOG (3 DAYS)

DAY 1

- Sleep quality: _____
- First stress signal noticed: _____
- What I did: _____
- Result after 60 minutes: _____

DAY 2

- Sleep quality: _____
- First stress signal noticed: _____
- What I did: _____
- Result after 60 minutes: _____

DAY 3

- Sleep quality: _____
- First stress signal noticed: _____
- What I did: _____
- Result after 60 minutes: _____

Reflection: What pattern did I see across 3 days?

“OWN YOUR HEALTH” CLINIC CARD

Bring this to appointments. You are the owner.

- Top 2 symptoms: _____
- What changed before this started: _____
- What I have tried / results: _____

MY QUESTIONS TODAY:

1. What root causes are most likely here?
2. What lifestyle actions should I try first?
3. What would success look like in 30 days?

Action: Ask for plain-language explanations and next steps in writing.

STOIC REPS, WEEKLY REFLECTION, DEFINE “OPTIMAL”

MINDSET PRACTICE: STOIC REPS

Prompt 1: What can I control today that moves my health forward by 1 percent?

Prompt 2: What must I accept today without wasting energy?

Prompt 3: One sentence of self-talk I will use this week:

"I choose _____."

WEEKLY REFLECTION PAGE

WINS

- One choice I am proud of: _____
- One signal I caught earlier than usual: _____

LESSONS

- Biggest stress trigger I noticed: _____
- What worked to reset: _____
- What did not work: _____

ADJUSTMENTS FOR NEXT WEEK

- I will keep: _____
- I will change: _____
- New tiny habit to test: _____

Tracking: Progress snapshot

- Average stress this week (1–5): _____
- Average energy this week (1–5): _____
- Training sessions completed: _____ / _____
- Nights with phone down 60 minutes before bed: _____ / 7

SECTION II

REBUILDING THE SYSTEM

Health Markers & Education

Icons:  Reflection •  Action •  Tracking

CHAPTER SNAPSHOTS & KEY CONCEPTS

HEALTH MARKERS · EDUCATED, NOT MISLED

CHAPTER SNAPSHOTS

HACKING YOUR WAY TO HEALTH

- No shortcuts. Integrate whole-body training, clean inputs, sleep discipline.
- Tools ≠ cheats. Use cold exposure, peptides, and HRT appropriately and safely.
- Morning wins set the day. Start strong, then stack small, repeatable habits.

THE TOLL OF STRESS

- Cortisol in excess wrecks recovery, hormones, and mood.
- Signals appear before breakdown, catch them.
- Face stress head-on with training, sleep, nutrition, and honest self-audit.

KEY CONCEPTS RECAP

- **Know your numbers** (labs, hormones, inflammation).
- **Educate yourself**—and filter out misinformation.
- **Own your plan**—tiny, daily, trackable actions.

Reflection: What does “rebuilding my system” mean for me this month?

KNOW YOUR NUMBERS (STARTER LAB LIST)

CORE HORMONES & RELATED MARKERS

SEX HORMONES

- ☐ Total Testosterone
- ☐ Free Testosterone
- ☐ SHBG (Sex Hormone Binding Globulin)
- ☐ Estradiol (E2, sensitive assay)
- ☐ DHEA-S
- ☐ LH / FSH

THYROID

- ☐ TSH
- ☐ Free T3
- ☐ Free T4
- ☐ Reverse T3
- ☐ Thyroid antibodies (TPO, TgAb)

This workbook is for education and self advocacy. It is not medical advice.

METABOLIC & INFLAMMATION

- ☐ Fasting insulin
- ☐ Fasting glucose
- ☐ HbA1c
- ☐ Lipid panel (HDL, LDL, TG)
- ☐ ApoB
- ☐ Lp(a)
- ☐ hs-CRP
- ☐ Homocysteine

NUTRIENTS & GENERAL HEALTH

- ☐ Vitamin D (25OH)
- ☐ Vitamin B12
- ☐ Folate
- ☐ Ferritin / Iron panel
- ☐ Magnesium (RBC preferred)
- ☐ CMP (Comprehensive Metabolic Panel)
- ☐ CBC (Complete Blood Count)
- ☐ AM cortisol (consider diurnal/salivary pattern)

Reflection: Which markers am I most unsure about?

DOCTOR QUESTIONS & RED FLAGS

ASK YOUR DOCTOR (HORMONES & INFLAMMATION)

1. Based on my symptoms and goals, which **root causes** are most likely?
2. Which **labs** will clarify them now? Which can wait?
3. What are **optimal ranges** (not just “normal”)?
4. If X is abnormal, what is the **first lifestyle action** you recommend?
5. What is the **slow-and-safe titration** plan if therapy is indicated?
6. How will we **measure progress**—which markers and by when?
7. What are **nondrug options** we should try first?
8. What side effects should be watched for and how do we **coursecorrect**?

RED-FLAG SYMPTOMS (TRACK & ESCALATE)

Seek evaluation promptly if these occur.

- ☐ Chest pain, pressure, or shortness of breath at rest
- ☐ Severe, sudden headache or new neurological deficit
- ☐ Rapid swelling of legs/ankles or unexplained weight gain
- ☐ Persistent fever, night sweats, or unexplained weight loss
- ☐ Blood pressure consistently > 140/90 at home
- ☐ Fasting glucose repeatedly > 126 mg/dL or random > 200 mg/dL
- ☐ Suicidal thoughts or profound mood changes

Reflection: What's one question I will bring to my appointment?

EDUCATION WITHOUT MISINFORMATION

BUILD A BETTER FILTER

Trust but verify—use these quick lenses before you act on advice.

SOURCE QUALITY

- ☐ Primary science or expert consensus?
- ☐ Clear conflicts of interest disclosed?
- ☐ Mechanism + outcomes, not just anecdotes?

PRACTICAL FIT

- ☐ Safe, available, and **pushes me to do more** (not make excuses)?
- ☐ Works **with** training, sleep, and nutrition, not instead of them?
- ☐ Progress can be **measured** in 2–4 weeks?

5-MINUTE RESEARCH LOOP

1. Define the claim in one sentence.
2. Check two reputable sources.
3. Look for contraindications.
4. Decide a tiny test you can track.
5. Review results; adjust or discard.

Reflection: What lab result or symptom am I most unclear on?

ONE TOPIC I'LL RESEARCH THIS WEEK

Topic: _____

What I want to know

TWO SOURCES I'LL READ/LISTEN TO:

1) _____ 2) _____

How I'll test this safely (tiny step):

What I'll measure and when:

Action: Schedule 20 minutes on my calendar for this research.

MICROACTION PLAN & HABIT EVALUATION

SCHEDULE THE LABS / BOOK THE VISIT

Target date: ____ / ____ / ____

Location / Provider: _____

Prep notes (fasting, morning draw, meds):

EVALUATE ONE HABIT (THIS WEEK ONLY)

Habit to audit: _____

Why this one: _____

Keep / Change / Replace: ☐ Keep ☐ Change ☐ Replace

Tiny test (next 7 days): _____

Tracking: Daily check

Mon ☐ Tue ☐ Wed ☐ Thu ☐ Fri ☐ Sat ☐ Sun ☐

Reflection at week's end: What happened when I changed this?

MORNING WIN WORKSHEET (OPTIONAL)

Alarm out of reach? ☐ Yes

Immediate movement (what & minutes): _____

Cold water exposure: ☐ Face ☐ Shower ☐ Skip today

First meal = protein first? ☐ Yes ☐ No

Screenfree window (minutes): _____

LAB SNAPSHOT & INSIGHTS

LAB SNAPSHOT (WRITE-IN TABLE)

Marker	Baseline (date)	Result	Goal/Optimal	Notes
Example: Free T	20251005	9.2 pg/mL	15–25 pg/mL*	discuss titration

Optimal ranges vary by lab, age, and context. Use with clinician guidance.

RESULTS & INSIGHTS (WRITE-IN)

What improved?

What needs attention?

Next step I will take in the next 7 days:

Action: My commitment:

“I will act on one number this week—small step, clear measure, honest review.”

SECTION III

THE HORMONE ADVANTAGE

Understanding & Optimizing Hormones

Icons:  Reflection •  Action •  Tracking

KEY CONCEPTS & PERSONAL BASELINE

NORMAL ≠ OPTIMAL · ENERGY DRIVES EVERYTHING · WORK WITH EXPERTS

QUICK LENS:

- *Normal ≠ Optimal*: “Average” lab ranges aren’t my target.

- *Hormones → Mood/Energy/Performance*: If these wobble, check upstream.

- *Expert Over Fads*: Individual plan, slow-and-safe changes, measured results.

Reflection: How does my energy fluctuate through the day?

Reflection: What would “optimal performance” look like for me?

Body: _____

Mind: _____

Purpose: _____

Action: One thing I’ll do this week to move toward optimal:

HORMONE OPTIMIZATION READINESS (CHECKLIST)

READINESS CHECKLIST

SLEEP

- ☐ 7–9 hrs target
- ☐ Fixed wake time
- ☐ Dark, cool room
- ☐ No screens 60–90 min prebed
- ☐ Morning light within 60 min

TRAINING

- ☐ 2–3x/week resistance
- ☐ 2–3x/week cardio (zone 2/intervals)
- ☐ Walks daily
- ☐ Form > ego
- ☐ Deload week every 6–8 wks

DIET

- ☐ Protein at breakfast
- ☐ Whole foods > processed
- ☐ Limit alcohol
- ☐ Hydration + electrolytes
- ☐ Fiber daily (produce/beans)

RECOVERY

- ☐ Breath work / mobility
- ☐ Stress reset menu ready
- ☐ Rest day planned
- ☐ Sun/time outside
- ☐ Social connection

Reflection: Which readiness area is my weak link right now?

CLINIC PREP · EVALUATION QUESTIONS & NOTES

BRING THESE QUESTIONS

1. Which **root causes** fit my symptoms? What could we be missing?

Notes: _____

2. Which **labs now**, which later? What are **optimal** ranges for me?

Notes: _____

3. If therapy is indicated, what is the **slowandsafe titration** plan?

Notes: _____

4. What **nondrug** actions should I start first (sleep, diet, training)?

Notes: _____

5. How will we **measure progress** (markers, symptoms, timeline)?

Notes: _____

6. What **side effects** should I watch for? How will we adjust?

Notes: _____

Action: Appointment date & time: _____

THE TOMO CHALLENGE SHEET

1. WHAT ARE YOU TESTING — AND WHY?

- “What labs are we running today?”
- “Why these, and what decisions will they inform?”

Doctor’s answers:

2. WHAT ARE YOU NOT TESTING — AND WHY NOT?

- “Are we checking sex hormones (T/E2/Prog), thyroid beyond TSH, and inflammation (e.g., hsCRP)?”
- “If not, why? What’s the plan to add them?”

Doctor’s answers:

3. WHAT ARE MY OPTIONS BEFORE MEDICATION?

- “If numbers are off, what lifestyle changes come first?”
- “What’s the slowandsafe approach if we start therapy?”

Doctor’s answers:

Reminder: You’re not there to be managed. You’re there to be **informed**.

MICROACTION PLAN · TRACK ONE METRIC (7 DAYS)

SECTION IV

NUTRITION, MOVEMENT, AND RECOVERY

The Fuel & Framework

Icons:  Reflection •  Action •  Tracking

KEY CONCEPTS & PERSONAL AUDIT

CONSISTENCY > INTENSITY · NUTRITION =
LONG-TERM FUEL · RECOVERY IS ACTIVE

QUICK LENS:

- *Consistency beats hero days.* Small wins, repeated.

- *Food is fuel.* Plan it like training.

- *Recover on purpose.* Sleep, mobility, sunlight, breath.

Reflection: What's my biggest energy leak right now?

Reflection: What meals or habits derail my goals?

Action: One realistic change I'll make this week:

MOVEMENT · DAILY MINIMUMS & WEEKLY PLAN

DAILY MOVEMENT MINIMUMS (CHECK EACH DAY)

BASELINE TARGETS

- ☐ 7,000–10,000 steps
- ☐ 10–15 min mobility/breath
- ☐ 30–45 min purposeful movement (walk, jog, cycle, sport)

STRENGTH & CARDIO CADENCE

- ☐ 2–3×/wk resistance (fullbody or split)
- ☐ 2–3×/wk cardio (zone 2 or intervals)
- ☐ 1 deload/restorative day

 **Tracking:** Weekly tracker

 **Reflection:** Which movement minimum is easiest to keep? Hardest? Why?

NUTRITION · FUEL PLAN & HYDRATION GOALS

FUEL PLAN (SIMPLE AND REPEATABLE)

Protein first at meals · **Whole foods > processed** · **Plan, don't guess**

PANTRY SWAPS (CHOOSE 3 TO TRY):

- ☐ Chips → raw nuts
- ☐ Sugary cereal → oats + berries
- ☐ Soda → sparkling water
- ☐ Candy → fruit + dark chocolate
- ☐ Creamy dressings → olive oil + vinegar
- ☐ White bread → sprouted/whole grain
- ☐ Takeout → batchcooked bowls

HYDRATION GOALS

- **Daily:** $\text{bodyweight (lb)} \times 0.5\text{--}0.7 = \text{oz target}$
- **Electrolytes:** during workouts/sauna or heavy sweat days
- **Morning:** 12–20 oz water before caffeine

 **Reflection:** One meal I'll standardize (ingredients/prep):

RECOVERY • SLEEP & ACTIVE RECOVERY MENU

SLEEP TARGETS

- ☐ 7–9 hrs in a dark, cool room (65–68°F)
- ☐ Fixed wake time (±30 min)
- ☐ No screens 60–90 min prebed
- ☐ Protein + carbs at dinner if evening training
- ☐ Caffeine curfew (before 12–2 pm)

ACTIVE RECOVERY MENU

- ☐ Zone 1–2 walk or cycle (20–45 min)
- ☐ Mobility circuit (hips/shoulders/Tspine)
- ☐ Sauna / contrast (as tolerated)
- ☐ Soft tissue work (foam roll, ball)
- ☐ Sunlight exposure 10–20 min

WIND-DOWN PLAN (CHOOSE 2–3)

- ☐ 10 slow nasal breaths (4 in / 6 out)
- ☐ Hot shower or bath
- ☐ Low light / no overheads
- ☐ Read paper pages
- ☐ Gentle mobility / stretch 5–10 min
- ☐ Gratitude lines ×3

WEALTH, LEADERSHIP & LEGACY

Integration Beyond the Body

Key Concepts

- Wealth = Freedom to serve and create
- Leadership starts with discipline
- Legacy = Health + Wealth + Impact

KEY CONCEPTS & REFLECTION

 **Reflection:** How do I define legacy?

 **Reflection:** What example do I want my children / team / community to see?

 **Action:** One daily habit that builds both health and wealth
